The aging is an interesting topic

Excellent experience!

It was a very clear way to get introduced to aging, and I would like to follow up!

The day was very interesting

Being able to discuss with the speakers allows you to deepen the topics covered.
How would you rate the scientific content of the course?
15 responses

- 73.3% Appropriate
- 26.7% Too high

Kindly elaborate your answer
3 responses

Appropriate for our multidisciplinary PhD program

The course provided interesting insights for our research

The topics covered were very interesting and very clearly represented.

Concerning teaching and working methods, I find

That there was a good balance between group work and lectures
15 responses

- 60% Agree
- 40% Mostly agree
That the lectures were relevant in relation to the group work
15 responses

- 60% Agree
- 20% Mostly agree
- 20% Mostly disagree
- 13.3% No opinion
- 13.3% Disagree

That the group work contributed to the overall learning outcome of the course
15 responses

- 66.7% Agree
- 13.3% Mostly agree
- 20% Mostly disagree
- 20% No opinion
- 13.3% Disagree

To what degree did the course fulfill your expectations?
15 responses

- 73.3% To a high degree
- 26.7% To some degree
- 20% To a low degree
- 13.3% To a very low degree
- 13.3% No opinion
Kindly elaborate your answer

The group work, although there wasn't much time helped a lot to understand basic questions that rise when someone studies aging

The course provided a high level international profile experience

The course exceeded expectations as I did not expect the opportunity to discuss in more depth with the various speakers.

Which elements of the course worked well and which parts did not?
5 responses

I found all the interventions interesting. Admirable Claus

Well planned and well presented.

The part of the division into groups was a really fantastic idea, but perhaps we needed to have more time.

The idea of dividing the students into different rooms to process the questions was very nice.

lectures and workgroup were both excellent done

Do you have suggestions for how we can improve this PhD course?
5 responses

No suggestion

Maybe combine students from two universities for the work groups?

Perhaps laboratory experiences could be proposed for students interested in this field

Provide more time to process questions for discussion after the various presentations by the speakers.

I think the group work was a beautiful idea that should be included in other PhD course. this one, conducted by Prof. Berliocchi, should be taken as a model.
